A slow manifold of your dynamical system

A. J. Roberts, University of Adelaide http://orcid.org/0000-0001-8930-1552

11:05am, August 9, 2023

Generally, the lowest order, most important, terms are near the end of each expression.

Specified dynamical system

$$\dot{u}_1 = \sigma w_1 + \varepsilon^4 u_2^3 u_1^2 \gamma + \varepsilon^2 (-u_2^3 \gamma + u_2^3) - \varepsilon u_1^2$$

$$\dot{u}_2 = -c u_2 + \sigma w_2 - \varepsilon u_2 u_1 + u_1$$
off echo;

Time dependent slow manifold parametrisation
